Art Unit: 3751

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 11, 13, 17, 18 and 21-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Carolan.

The term "chemical" of claim 1, line 1 defines no structural limitation here. See the housing 13, toilet 15 and storage tanks 10. The "coupling" is seen where 45 is employed. The pumping coupling is seen where the outlet conduit connects to the tank. The claim 2 recess is seen at 14 and the fresh water access is seen at 40. The spray nozzles are seen in 43. Claims 3-4 are met by the plurality of openings in 43. Re: claim 11; see the funnel shape of tank 10. Re: claim 13, the enclosure here would be expected to have four walls, door and roof.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 12 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carolan, as applied supra.

Application/Control Number: 10/661,841

Art Unit: 3751

To provide these expedients would have been obvious to the ordinary artisan, as they are well known, of which official notice is taken

Claims 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carolan, as applied supra, in view of Corsiglia.

To provide the former with a pivoted seat and a urinal as taught by the latter in Fig. 3, see element 71 for the urinal, would have been obvious to the ordinary artisan as both teach portable toilet environments. To further add a lid would have constituted on obvious expedient as same is well known, of which official notice is taken.

The traversal of the restriction is noted but is not well taken. With respect to the instant claims the sub-combination has utility in the absence of a vehicle and the combination does not require the particulars of the various dependent claims 3-6 etc. The election of the species of Fig. 8 is noted; however, no listing of claims deemed readable thereon has been made. Claims 7-10 are directed to Fig. 7 and therefore not readable on Fig. 8. Claims 21-22 are acted upon as a courtesy as they read on Carolan, but they are could be divided from I by the "forming" step.

Claims 7-11, 15 and 16 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 2/14/05.

-DeBoliac shows a servicing vehicle.

Art Unit: 3751
